

Joel Jesús Marcori

Corrientes Capital, Argentina · [LinkedIn](#) · +54 379 428 0036 · joelmarcori1@gmail.com · [GitHub](#)

Software Engineer and Tools Programmer. Currently in my final year of a B.Sc. in Information Systems. Specialized in designing scalable backend architectures (C#, .NET, CQRS, Event Sourcing) and building highly optimized, immersive web experiences (React, WebGL). Possesses a unique hybrid profile, leveraging 5 years of experience as a technical 3D artist to automate pipelines, design intuitive tools, and optimize complex UI/UX data flows. Proven leadership in agile development, with a strong academic background in software engineering patterns and algorithms. Passionate about RPGs and eager to build the foundational technology that empowers game development teams.

PROFESSIONAL EXPERIENCE

OcioStore (Business & Data Management Tool)

Corrientes, Argentina

Full-Stack Developer | C#, .NET Framework, WinForms, SQL Server

December 2024– November 2025

- Developed a C# desktop application with Windows Forms for inventory and sales management.
- Designed a strict 4-tier architecture to handle complex relational data, CRUD operations, and real-time interactive performance dashboards.
- Optimized User Experience, User Interface, and process automation.
- Facilitated team collaboration and performance by adopting agile practices (SCRUM), managing the task backlog, and maintaining comprehensive documentation to ensure project consistency.

3D Interactive Web Portfolio

Corrientes, Argentina

Frontend Engineer & Technical Artist

March 2026 – April 2026

- Designed and built an immersive, hybrid 3D/2D web application using React, Vite, and React Three Fiber.
- Optimized WebGL rendering pipelines, achieving high Lighthouse performance scores through Draco compression, texture atlasing, and lazy loading.
- Implemented global state management, mathematical camera interpolation, and dynamic i18n localization (EN/ES).

Freelancer – Fiverr

Corrientes, Argentina

3D Modeler & Visual Content Creator

April 2021– Present

- Gained deep empathy for the end-user by navigating complex 3D content creation workflows (PBR texturing, UV mapping, topology optimization).
- Continuously identified pipeline bottlenecks and developed custom scripts to automate repetitive tasks, ensuring assets met strict technical guidelines for engine integration.
- Managed strict deadlines and iterative feedback loops, demonstrating ability to work within asset production pipelines.

Internship – Aguas de Corrientes

Corrientes, Argentina

Electromechanical Technician

June 2019–September 2019

- Assisted in technical infrastructure maintenance, operating within strict protocols and analyzing systems to drive operational improvements.

EDUCATION

- B.Sc. in Information Systems - Final Year in progress.
- University Programmer Analyst - Degree Obtained. GPA: 8.65.
- Teaching Assistant – Algorithms & Data Structures I (2024), Software Engineering I (2026):
 - Mentored students in fundamental logic, memory management, and code optimization using C.
 - Cultivated the ability to take criticism, elicit requirements, review peer code, and communicate complex technical solutions effectively within a team environment.
- Researcher: Member of the Software Quality Research Group (2024-2025)

- Class of 2019 Valedictorian | National Flag Bearer.
- National & Provincial Electromechanical Olympiad Participant.

COURSES & CERTIFICATIONS

- Introduction to AI with Python – Domestika (2024)
- HTML & CSS Web Designer – Folcademy (2023)
- Basic JavaScript – Folcademy (2023)
- Unity Specialization – Codo a Codo 4.0 (2022)
- Full-Stack Python Developer – Codo a Codo 4.0 (2021)

PORTFOLIOS

- Personal Projects: <https://github.com/JJoelM>

TECHNICAL SKILLS

- Languages: C#, Python, C++, JavaScript, PHP, C, SQL.
- Game Dev & Tools: Unity, Blender (3D Modeling), Visual Studio, Git, Linux/Unix (Command Line), Unreal Engine.
- Frontend & Web 3D: React, HTML/CSS, Tailwind CSS, Vite, Three.js (React Three Fiber), WebGL.
- Backend & Architecture: .NET Framework, CodeIgniter 4, CQRS, Event Sourcing, 4-Tier Architecture, SQL Server, MySQL.
- Others: Git, Scrum, AI, Data Science, Cloud Computing, Figma (basic).

LANGUAGES

- Spanish: Native
- English: C1 – EF SET

RELEVANT EXPERIENCE & INTERESTS

- Dungeons & Dragons Game Master: Design and balance custom gameplay mechanics, economy systems, and combat encounters. Experience analyzing player behavior to tweak difficulty and pacing.
